WHERE WE ARE

Dashboard

Conversion Rates

Poor user experience

Ineffective messaging

Technical issues

Data Collection

Missed opportunities

Not targeting
correct leads

Wasted resources

Cost of Bad Reviews

"Arrived late"
"Only got one, ordered two"

"Poor quality"
"False advertisement"

Constantly receiving bad reviews affects sales

Conversion Rates

Visit Origin

In order to improve conversion levels, Olist should focus on the following visit origins:

Organic Search

Visiting via search engine

Paid Search

Visiting via paid advertisements

Direct Traffic

Visiting via website URL

Direct Traffic represents the highest overall conversion rate, demonstrating that the appearance of the website is very important in order to obtain new sellers.

Conversion Rates

Lead Behavior

Olist implemented the DISC model to understand the behavior of their merchants and help their Sales Reps shape their communication accordingly.

A Steady-Green people-oriented landing page could include the following characteristics:

- Clear and Concise Information
- Images and Videos
- Opinions and experiences of other clients
- Avoid aggressive or confrontational language

The **Steady-Green** people profile represents the highest **conversion rate** in terms of the transition of **merchants to sellers**.

Olist could adapt its landing page to fit the specific characteristics of this group of people.

Amazon Connect

Omnichannel cloud connect platform

- Set up a contact center
- Add agents
- Engage with customers

Third-Party Integration

- API
- Salesforce

Personalized Experience

- Chat
- Voice Contact

A unified experience across multiple channels

- Use same routing profiles, queues, flows, metrics, and reports for all channels
- Monitor all channels from one dashboard
- Agents handle all customers from one interface
- 78% of SME's that use Amazon started using the platform between 2020 and 2022

The Battle for Mexico

81%

2022 e-Commerce growth

14%

CAGR 2023–2027
